2023 Global Sustainability Supply Chain Student Competition

The Global Sustainability Supply Chain Student Competition is an event that invited postgraduate and undergraduate students from universities around the world to develop innovative solutions to real-world challenges facing global supply chains. This international competition brought together 71 teams from around the world to solve global supply chain challenges while contributing to UN SDGs.

The competition consisted of three rounds, including a written submission, a presentation, and a final presentation. Teams had to compete to advance to the next round.

The competition cases were provided by AI Cargo Foundation, Babemax, Cainiao, GSU Supply Chain Innovation Center and Business Incubator, LONGI, Nulogy, and Schneider Electric.

Special thanks to the judges from these prestigious institutions: The United Nations Group of Friends of Sustainable Transport, the United Nations Global Compact Principles for Responsible Management Education Foundation, The World Bank Group, China Development Research Center of the State Council, France Ministry of Transport, Maersk, TT Club, Global Reporting Initiative, International Federation of Freight Forwarders Associations, International Center for Transport Diplomacy, Sino American Logistics Council, and Global Supply Chain Classroom.
